

technical bulletin

TO: All Region Managers, Field Sales, Account Executives,
Plant Managers, And Atlanta Sales

NUMBER:

FROM: Richard Roe, Director, Technical Services,
Commercial Roofing Products

DATE: May 13, 2003

SUBJECT: ATLAS NAIL BASE FASTENERS

Please note the following installation recommendations for Atlas Nail Base Fasteners:

- The fasteners should be installed using an 1800-2500 RPM (max) screw gun with a hardened # 3 square drive bit. Standard electric drill guns are not recommended for installation of the Atlas Nail Base Fastener.
- Metal decks are acceptable deck types provided they are min. 22 ga (min.) and 18 ga (max.). Be sure to determine the gauge of the deck. If it is 16 ga, consult the Atlas Technical Department.
- This information will be added to our web site and our literature as it is reprinted.

If you have any questions, please let me know.
