

# Why Atlas Ventilation?

*Protect where you live* 

**RIDGE VENTS**

**BOX VENTS**

**POWER VENTS**

## It's The Most Efficient Type of Exhaust Vents

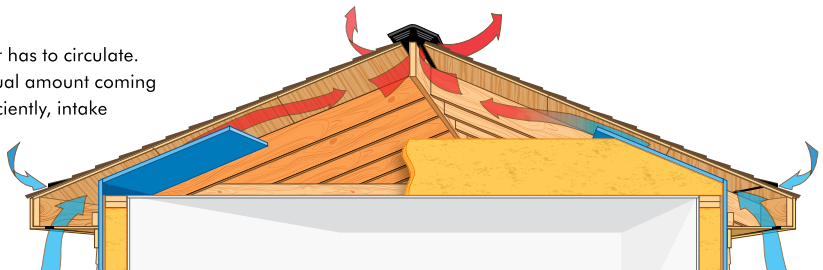

Atlas TruRidge® and HighPoint® ventilation products offer a variety of options to provide efficient airflow that helps regulate your attic environment. By creating a continuous flow of air upward from the eaves/soffits near the top of the roof line or the ridge, you can achieve the best exhaust ventilation for your attic.

Atlas' full line of ventilation products includes ridge and off-ridge vents that are important components of the Atlas Signature Select® Roofing System. So, why Atlas ventilation? Our innovative products include the following unique features:

- A specially formulated polymer that makes Atlas vent products your most efficient option.
- Filtered products with a new low-profile design increase protection from wind-driven rain, snow and pests. The innovative filter material protects the attic space better than traditional fiberglass filters.
- Static vent options include both galvanized steel and aluminum off-ridge options, for more variety.
- For additional air flow needs, power vent products offer both thermostat and humidistat technology.
- Additionally, all off-ridge products are paint-able and discrete, to provide customization in ventilation choices.

### Creating a Balanced System

Ventilation systems require balance. In other words, air has to circulate. Every inch of air that goes out must be offset by an equal amount coming in through the intake vents. For the system to work efficiently, intake and exhaust vents must be positioned precisely.

# Ridge Vents

## TruRidge® STANDARD EXHAUST VENT

A standard ridge vent of time-tested design and proven performance. Options are available to suit your requirements.

## TruRidge® ALL-WEATHER EXHAUST VENT

Similar design to our TruRidge® exhaust vent, the TruRidge® ALL-WEATHER exhaust vent offers the same proven performance, but better. Available with a filter to help combat driving wind, rain, snow, dust, and insect infiltration.

## TruRidge® PRO EXHAUST VENT

A low-profile exhaust vent featuring a firm and pliable design, Atlas TruRidge® PRO exhaust vent accommodates extreme roof pitches while providing excellent air flow.

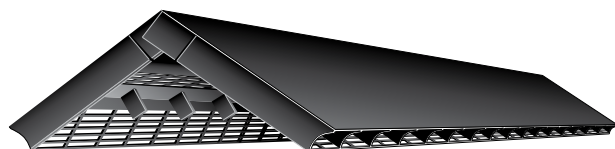

## HighPoint® PERFORMANCE XL EXHAUST VENT

Provides a more complete barrier to ensure better protection from wind-driven rain, snow, dust, and insect infiltration.

## HighPoint® INVISARIDGE EXHAUST VENT

The high-performance, innovative design of HighPoint® INVISARIDGE has no exterior baffles, making it virtually undetectable from the street while allowing just as much airflow as external baffle products.

# Rolled Vent

## TruRidge® PRO 25 ROLL VENT

The Atlas low profile rolled ventilation rolls out quickly and lays flat for a smooth roof ridge. It offers the rigidity of a sectional ridge vent, but the increased convenience of a faster installation.

# Slant Back Vents

## HighPoint® AL 50 & GL 50 Slant Back EXHAUST VENTS

Low-profile, roof-mounted, AL 50 aluminum, and GL 50 galvanized steel, static box vents are designed to work with open attics. Located just off the ridge, these vents work best with soffit ventilation.

# Power Vents

## HighPoint® Power Vent HT

This sleek roof-mounted power vent comes with a Pre-wired Humidistat and Thermostat and is capable of venting attics up to 1650 Sq. Ft.

## Filters

All filters have a low profile and innovative design that better protects the home from wind-driven rain, snow and pests. We use a spunbond material that protects the attic space better than the fiberglass filters competitors use.

## Increase The Protection!

When you install an Atlas Signature Select® roofing system, all components are designed and backed by the industry's best warranty coverage — and the peace of mind that comes with it.

### System Components

- 1 Atlas WeatherMaster® Ice & Water Underlayment
- 2 Atlas Premium Underlayment
- 3 Atlas Pro-Cut® Starter Shingles
- 4 Atlas Roof Shingles
- 5 Atlas TruRidge® or HighPoint® Ventilation Products\*
- 6 Atlas StormMaster®, Pro-Cut® or ProLam™ Hip & Ridge Shingles

\* Warning: For proper ventilation and performance, **do not mix multiple types of exhaust vents to vent the same attic space.** The picture is for illustration purposes only. A valid system warranty will cover only one type of exhaust vent per attic area.
