

Enhanced Warranty Program Checklist

Atlas is proud to introduce our enhanced warranty program, now available to AtlasPRO+™ contractors. Before you can achieve Select status, standard underwriting guidelines require that you first undergo an approval process. Fortunately, we've made this incredibly simple for you.

Follow the steps below and this checklist will help you apply.

1. Log in to your Atlas Pro Contractor Portal and select the HUB page. ☐
2. Complete a short questionnaire. ☐
3. Upload required documents: ☐
 - ☐ General Liability and Worker's Compensation Insurance
 - ☐ Secretary of State filings
 - ☐ State and local licenses
 - ☐ Additional documentation (optional)
4. Complete a product training course comprised of four modules that discuss best practices in roofing. At the conclusion of each module, you will be asked to complete a short quiz to check for understanding of the information you just watched. ☐
5. Once the course is complete, you will receive an email asking you to review and sign the AtlasPRO+™ Select contractor master program participation agreement. After you are approved, you will be able to offer Atlas Signature Select® enhanced warranties through your Atlas Pro Portal. ☐
