Atlas Pro-Cut® & StormMaster® Hip & Ridge Shingles Warranty Eligibility

This technical bulletin addresses the use of Pro-Cut Hip & Ridge shingles manufactured out of our Ardmore manufacturing facility prior to February 1, 2021. These specific hip and ridge shingles can be used in lieu of StormMaster Hip & Ridge shingles as a qualified component of the Signature Select, Signature Select Pro and Signature Select Pro 50 warranties. In addition, Atlas Pro-Cut Hip & Ridge shingles manufactured prior to February 1, 2021 can be used to satisfy the StormMaster Shake 150 mph enhanced wind warranty.

Atlas Pro-Cut Hip & Ridge shingles manufactured in Ardmore prior to February 1, 2021, were manufactured with modified asphalt and satisfy the performance characteristics for use with StormMaster shingles. Atlas Pro-Cut Hip & Ridge shingles manufactured starting February 1, 2021 and beyond, have changed to a non-modified asphalt in-line with industries standards.

The new StormMaster Hip & Ridge shingles are exclusively designed to complement the Atlas StormMaster Shake and StormMaster Slate shingles with proprietary Core4® Technology, providing superior performance and matching colors.
