

Pinnacle® Sun

Cool Roof Technology That Fights Smog

Save an Average of
Up to 15%
on Cooling Costs*

5 Great Reasons

Why You Should Choose Pinnacle® Sun!

1

3M™ Cooling Technology that reflects the sun's radiant heat away from your roof, keeping your home cooler in the summer.

3M COOLING
technology

2

3M™ Smog-Reducing Granules convert smog into plant food, making your roof work for you and the environment.

3M SMOG
reducing technology

3

With Scotchgard™ Protector, your Pinnacle® Sun shingles protect against black streaks caused by algae to enhance your home's curb appeal.

*A building with a cool roof and/or walls can significantly reduce a building's cooling costs by lowering the need for air conditioning, especially in warmer climates. The average energy savings for a cool roof range between 7% to 15% of total cooling costs. A cool roof can also help prolong the life of an air conditioning system by reducing the strain on the system during hotter times of the day and year.

Pinnacle[®] Sun

Cool Roof Technology that Fights Smog

The Solar Reflectance Index (SRI) is an indicator of the ability of a roof surface to return solar energy to the atmosphere. Roofing material surfaces with a higher SRI will be cooler than surfaces with a lower SRI under the same solar energy exposure, especially on a sunny day. Using materials with higher SRI values can enhance building occupant comfort and reduce air conditioning use. For more information, please reference the Cool Roof Rating Council: <https://coolroofs.org/>

Your Roof has Never Been Cooler

Pinnacle[®] Sun shingles are designed to be energy efficient, solar reflective and visually stunning with a color palette inspired by coastal regions. Pinnacle[®] Sun shingles are produced to meet the Cool Roof Rating Council's Solar Reflective Index (SRI) standards and may comply with city and state building codes for reflectivity.

Sun, Science, and Style

New to the Pinnacle[®] family of products, these shingles are manufactured to reflect the sun's radiant heat away from the roof, reducing the heat that enters the home.

In addition to groundbreaking reflective technology, Pinnacle[®] Sun also incorporates 3M[™] smog-reducing granule technology, with the smog-fighting capacity of 2-3 trees, helping to improve air quality, one roof at a time.

Combining these innovative technologies with the streak-fighting power of 3M[™] Scotchgard[™] Protector, this shingle packs tremendous value on your roof.

Upgrade to Pinnacle[®] Sun and experience the ultimate in shingle innovation.
